

European Forestry: By the Numbers

International Paper leads the world in responsible forest stewardship. Our actions create value for landowners, communities, customers and ecosystems on a global scale.

France has 16.9 million hectares of forestland

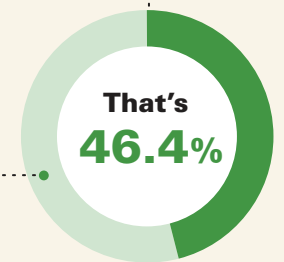

of the total land area of France

95% of forestland is working forest

75% is privately owned

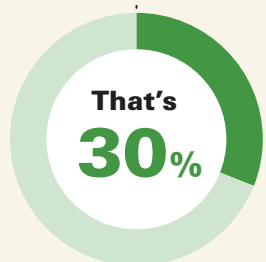

Russia has 865 million hectares of forestland

of the total land area of Russia

89% of forestland is working forest

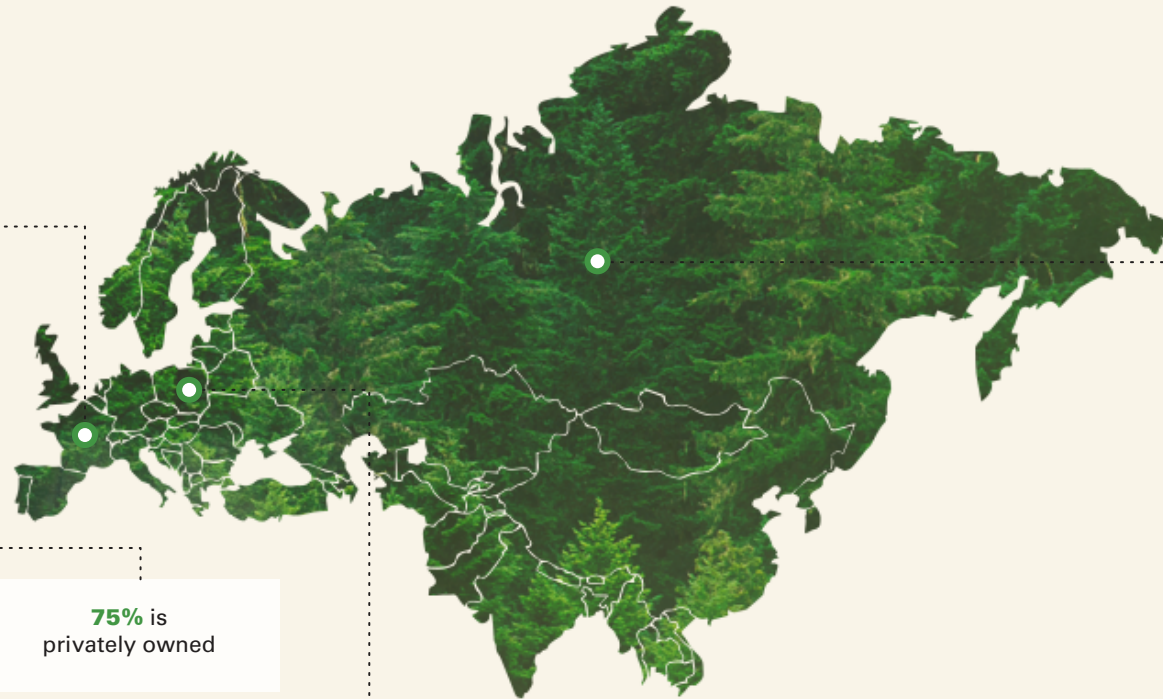

Poland has 9.3 million hectares of forestland

of the total land area of Poland

91% of forestland is working forest

19% is privately owned

All forestland leased by International Paper Russia is **FSC certified.**

Our Svetogorsk, Russia mill provides **more than 300 million gallons of potable water** to their local community every year.

In Poland, our employees are part of the **State Forest Advisory Committee**, which advises Poland's government on forest sustainability issues and to ensure native forests are managed sustainably.

The Comptoir des Bois de Brive (CBB), IP's wood sourcing business in France, has helped more than **700** forest owners implement sustainable forestry management practices.
